

STOP DOCK ACCIDENTS!

attach WORDEN WHEEL CHOCKS AT EVERY LOADING DOCK

1. Brakes can fail causing trucks to roll from the dock.
2. The force of handling equipment can move the truck.
3. Wood blocks can move and are often misplaced.
4. CHOCKS hold even on ice and snow.
5. CHOCKS are light and easy to use.
6. Trucks cannot leave the dock prematurely while chocked.

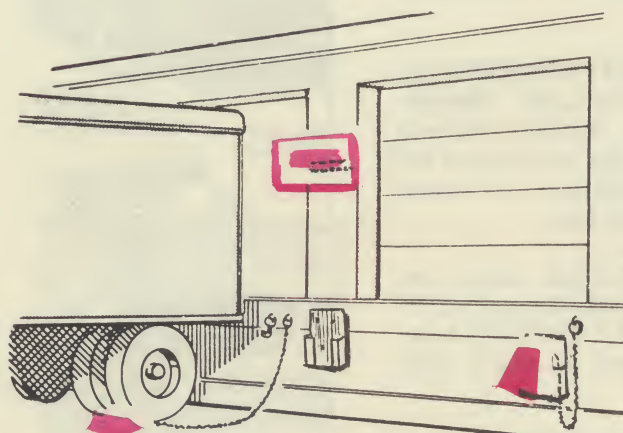

PRICES

REGULAR SIZE (LWC) **\$10** EA.

EXTRA LARGE (HWC) **\$15** EA.

6 or more, 10% Disc.

The loading and unloading of trucks must be done with fast modern handling equipment in order to keep pace with production. However, this requires extra caution in securing the truck at the dock. Every truck should be chocked at your dock to prevent serious accidents.

Fasten hooks on edge of the dock to hang CHOCKS as illustrated, when not being used. This prevents trucks from driving over chocks when backing into dock. Also dock attendant can see at a glance if chocks are being used.

Worden "Grip-Lock" SAFETY CHOCK

Positive Holding Device

For All Classes Of Fire Department,

Industrial, Public Utility, Municipal, Railroad and Airline Vehicles

**recommended safety equipment
for**

fire trucks . delivery trucks . moving vans .
fuel trucks . cargo carriers . towing and service
trucks . road equipment . construction trailers .
home trailers . airplanes . service stations .
garages

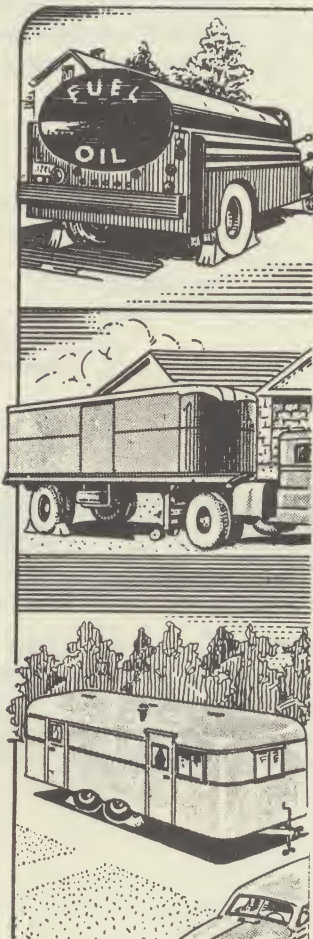

Worden SAFETY CHOCKS feature exclusive patented 'Grip-Lock' design. Provide positive protection against vehicle runaway accidents. Especially engineered for dependability in case of brake failure. Minimum weight causes teeth to bite and hold.

Effective on concrete, asphalt, mud, sand, ice, snow or grease. On steep inclines and difficult surfaces, Worden SAFETY CHOCKS have been successfully performance tested with weights up to 75,000 pounds.

Made of hollow, die-cast aluminum. Strong, ruggedly constructed for hard usage and long durability.

Ideal for use while making repairs, changing tires, putting on chains, when loading or delivering equipment.

Easy To Carry Light Weight Easy To Use

Available in two sizes for heavy equipment and light trucks.
